Research Activities to be implemented in 2013-2014
Within DS CRP for Central Asia

1. Identify and introduce tolerant, high-yielding and improved quality varieties of cereals, potato, vegetable, horticultural, fodder and oilseed crops in pure and mixed plantations through on-farm adaptive trials

2. Establish a seed system platform compatible with existing agro-ecological environments to supply farmers with high quality seed and planting materials so as to improve livelihoods, food security and incomes of smallholders

3. Improve the productivity of marginal lands in irrigated farming and pastoral systems

4. Improve water use efficiency through innovative technologies in irrigation and farming in cereals, potato, vegetable, horticultural and fodder crops

5. Establish Strategic Innovation Platform for out-scaling Dryland Systems CRP impacts
